

Connect and disconnect...

...it's that easy.

ATC40ASSDDA
greater flow
for heavy crude

ATC40ASSAPI

▶ Other options available, contact us!

Application:

- A reliable solution for loading and unloading crude oil from rail cars.

Features:

- robust aluminum body construction
- removable easy carry handle
- safe and reliable - valves will not open unless fittings are properly connected
- API configuration uses a stainless steel spring on the adapter and an Inconel™ spring on the coupler for corrosion resistance
- tank car spanner wrench available
