 Air Chief automotive ..... 221 - 222  
 Air Chief ARO interchange ..... 223 - 224  
 Air Chief Lincoln interchange .....225

**Steel 3500 nipples..... 226**

**Bent Stem Swivels..... 227**

**D.O.T. Air Brake .....228 - 239**

D.O.T. push-in fittings ..... 228 - 229  
 Legris D.O.T. push-in fittings ..... 230 - 233  
 Air brake..... 234 - 239

**Push-in.....240 - 258**

Brass..... 240 - 243  
 Stainless steel Legris..... 244 - 245  
 Nickel-plated brass Legris ..... 246 - 247  
 Nylon / Nickel-plated brass Legris ..... 248 - 250, 252  
 Nylon Legris.....251  
 Manifold, Legris.....252  
 Fittings kit, Legris.....252  
 Valves ..... 253 - 255  
     Ball .....253  
     Quick exhaust .....253  
     Flow control ..... 253 - 254  
     Check .....255  
 Metric..... 256 - 258

**⚠ WARNING**

The constant vibration created by air tools, like air drills and pavement breakers, is destructive to air hose couplings, especially the quick-acting type. To provide protection against coupling breakage and related hazards, Dixon® recommends the use of a whip hose. To construct a whip hose, connect one end of a short (3' to 10') air hose to the air tool using a 3500 type steel nipple. Connect the other end of the hose to the air supply using the standard quick-acting coupling. The heat-treated 3500 nipple will withstand vibration far better than the standard coupling and provide a safer connection. The whip hose should remain permanently connected to the tool.
